

SERVICE

MEMO

Service Memo No. 28

Revised: July 1, 1968

MISCELLANEOUS F.A.A. FIELD APPROVALS

The following installations have been F.A.A. approved in the field. The party securing the approval is also listed. In order to secure details of the installation in which you are interested, it will be necessary for you to contact, directly, the party by whom the approval was secured.

It is possible there will be a slight charge for the drawings and data for the modification due to the original costs involved in obtaining the approval from the F.A.A.

Additional approved installations are listed in the F.A.A. specifications for the various model aircraft. Suggest you first refer to the specifications for the model in which you are interested. It should be noted that this listing and the F.A.A. specifications do not contain all available S.T.C.'s applicable to Piper aircraft.

J3 F.A.A. APPROVED INSTALLATION

ENGINES - Planes with serial numbers 2355 and up.

Lycoming O-235-C (100 HP) John H. Lightstone, Box 274, Coffeyville, Kansas

Lycoming O-235-C1 (108 HP) Jay Myers, 228 E. Keller Street, Castanea, Penna.

NOTE: Each of the above installations require additional fuel.
