#### Whelen Strobe Tube Assembly and Lens

- Application: Cessna single engine aircraft 1972 and later

In this system the A610 and A612 are mounted directly onto the wingtip retainer. Use the A612 as a template for cutting a hole in the existing light shield. This system requires very little time or labor to install. The A612 enlargifying lens increases the light intensity by two to three times in the horizontal plane.
