Acrylic Sheets

Acrylic Plastic Sheets

Acrylic sheets have outstanding weathering characteristics and physical/color stability. Widely used in aircraft for windows and windshield material. Covered on both sides for added protection.

Priced per square foot. Sold in full 4 x 6 foot sheets only.

Cable

Flexible Control Cable

- All flexible control cable is priced per foot
- Common cable hardware can be found on page 198

7 x 7 Flexible Control Cable has seven strands of seven wires each. Used for control purposes where extreme flexibility is not required, but where abrasion control is a factor. Made to specifications MIL-W-1511 (galvanized) and MIL-C-5424 (stainless).

7 x 19 Extra Flexible Control Cable has seven strands of 19 wires each. Its greater metallic area makes it stronger than 7 x 7 cable. Because of its fine wires, the best service is obtained with 7 x 19 wire where abrasion is not too severe. These same fine wires, however, make it most flexible to meet severe bending. Made to specifications MIL-W-1511A (galvanized) and MIL-C-5424 (stainless).
